

Online Webinar

## Preventing Falls: Keeping Workers Safe & Cal/OSHA Compliant

**DATE:** April 25, 2024

**TIME:** 9:00 AM (Pacific Time)

[REGISTER](#)

Falls from heights are one of the most common accidents in the workplace and are the leading cause of **construction worker fatalities**. As a result, [fall protection](#) in construction was the top-cited OSHA standard in 2022. Injuries from falls affect not only a worker's physical abilities but can have lasting emotional and financial repercussions on not only the worker, but their family, coworkers, and the company's operations.

Join us for a 90-minute, live virtual webinar, led by our experts from Cal/OSHA and State Fund, who will walk you through everything you need to know about fall hazards, current regulations, proposed changes, and how best to protect your workers.

### We will cover

- The current and proposed trigger heights for different trades
- Identifying common fall hazards from specific trades
- How to properly identify the fall risks at your workplace
- How to plan and train for those risks and provide the appropriate equipment

Online Webinar

- The upcoming National Safety Stand-Down event which educates employees in fall and other job hazards and how you can deliver your own event
- How you can effectively implement fall protection at your workplace
- And much more...

Our seminars are free and open to all California employers and insurance brokers. **This event features a 90-minute presentation that includes a Q&A session.**

**Presented by:**

	
<p><b>Gary McIver, Senior Safety Engineer, Cal/OSHA Consultation</b></p> <p>Gary has more than 30 years in Health and Safety with nine years in private industry, nine years as an Associate Safety Engineer for Cal/OSHA's Sacramento District Office, and six years as a Cal/OSHA Region 2 Enforcement Senior Safety Engineer.
